

OurPDF Heading Organizer Test

Document

This PDF is designed specifically for testing title editing, heading detection, heading hierarchy, reordering, page navigation, bookmarks, and PDF export.

1. Introduction

1.1 Background

OurPDF is a document-processing platform designed to provide practical PDF tools for everyday document workflows. This section provides sample content that can be used to test automatic heading detection.

1.2 Objectives

The primary objective is to organize document titles and headings while preserving the original PDF content. Users should be able to edit, add, remove, and reorder headings.

1.2.1 Primary Objective

Verify that heading changes made in the editor are reflected in the exported PDF.

1.2.2 Secondary Objective

Verify that the generated PDF outline contains the expected hierarchy and destinations.

2. Methodology

2.1 Document Analysis

The test document contains multiple heading levels, numbered sections, normal body text, and enough content to exercise the heading organizer.

2.2 Heading Detection

A heading detection system may use font size, font weight, position, numbering patterns, and surrounding text to identify likely document headings.

2.2.1 Level Detection

Large bold headings should normally be recognized as H1, smaller section headings as H2, and subordinate headings as H3.

3. Test Content

3.1 Editing Test

Try changing this heading from '3.1 Editing Test' to another heading in the OurPDF editor.

3.2 Add Heading Test

Add a new heading on this page and verify that it appears in the heading tree.

3.3 Reordering Test

Move this section above or below another section and verify that the final PDF outline uses the new order.

4. Results

4.1 Expected Results

The exported PDF should preserve the original document while applying the title, heading, header, footer, page-number, and bookmark changes made by the user.

4.2 Verification Table

Feature	Expected Result
Title	Updated title is saved
H1 / H2 / H3	Hierarchy is preserved
Add Heading	New heading appears
Reorder	New order is preserved
Delete	Heading is removed
Bookmarks	PDF outline is clickable
Page Numbers	Numbers appear on pages

5. Conclusion

5.1 Final Verification

Use this section to verify that the final heading hierarchy and bookmarks remain correct after all editing operations.

5.2 Export Check

Open the exported PDF in Adobe Acrobat, Chrome, Edge, or another standard PDF reader and inspect the bookmarks/outline panel.
